Technical Contact Name		
Phone Number		
Email address		

(*) A producer may also serve as its own importer

(**) A producer may also serve as its own distributor (If you have several distributors, please provide a listing in the appendix)

F. COMPANY PROFILE

Internal control

Logging	
Is the use of the software and the data logged? If so, which actions, in what way and for how long?	
Are hardware plugins (USB sticks) logged?	

Internal organisation	
How many developers are working on the product?	
How is the development organized in your company? (Internal/external)	
Are development assignments outsourced?	

Dealers	
Have you imposed contractual provisions on your external dealers/installers ?	
What kind of access do external dealers have to the software?	

Technical support	
How is technical support organized for users?	

Risk Analysis	
Have you carried out a risk analysis for the software and/or the data(base)?	
Are clients' data collected, stored or shared with third parties including with commercial partners or external providers?	
If data are shared or sold, are clients made aware of it in a transparent and explicit way? Is their consent collected before any transmission to third parties?	
Warning – GRDP **Cash registers producers must respect the General Regulation on Data Protection (GRDP). Any collection, storage or transmission of personal data must comply with legal regulations in term of transparency, security and user consent.**	

External control

Other certificates	
Has a certification by another certification body been granted? A) For this type of cash register? If so, which one?	
B) For your Company? If so, which one? (e.g: ISO9001)	

If so, please attach the copy of the certificate in annex to this application.

Customers	
Have any customers set safety requirements? If so, which ones?	

If so, please provide the legal provisions (or a contract model) of the requirements, together with a technical description.

Insurance Company	
Have you taken out insurance for this product? If so, what risks are you insured for? What requirements does your insurance company set?	

If so, please provide a copy of the contract, together with a technical description if it would accompany the insurance contract

II. POINT OF SALE DESCRIPTION

A. POS IDENTIFICATION

POS identification	
POS Name	
POS Model	
Software version number	
Programming language(s)	

B. DATABASE ACCESS DECLARATION

Statement that users have no more than read-only access.	☐

C. DATABASE FEATURES

DB features			
The DB is…	☐ Central	☐ Local	☐ Both
The DB and the POS are both cloud-based	☐ YES	☐ NO	
DBMS identification			
DB Version Number			
Software name and version			
Access path			

In attachment, an overview should be displayed as a list of the following fields:

- ✓ Table Name, Field Name, Field Type, Field Length
- ✓ Short description if the field name is not self-explanatory (in English, Dutch or French)

Database	
The list contains all the requested columns	☐
The description is short and clear	☐

Additional information to deliver to the FPS Finances	
Description of the database format	☐
DB security*	☐
Data used and created by the POS	☐
Overview of tables containing event data	☐
Table layout of the data	☐
Relationships between the tables	☐

*Description of security mechanisms for DB access and conservation (Access rights, profiles, etc.)

Database capture	
FPS agents can access/copy relevant data	☐
URL, username, password are provided	☐
Does exported data need conversion?	☐
Conversion programs/scripts are provided	☐

DB Security	
Audit trail possible (logging of timestamps, user, Primary Key, ...)	☐ YES ☐ NO
What are the **security measures** against fraudulent manipulation (deletion, alteration, ...) of data? Please describe	

D. PRODUCT WARRANTY

What guarantees have been put in place to ensure that the software on the test machine and the RCRS installed on the customer's premises are identical?

E. UPDATES

For each modification on the POS, a request for a certification update is needed. Those updates are tested on the test machine. How do you implement updates on the test machine? (Remote, update via store, etc.)

In the framework of a certification, it is recommended to include a solution allowing secured remote access to the cash register to facilitate technical interventions, software updates and patches installation.

The use of a remote access software such as TeamViewer, AnyDesk, RustDesk, VNC, Zoho Assist or Splashtop is recommended in order to:

1. Allow remote updates and patches installation,
2. Ease technical support in case of issues,
3. Reduce intervention times.

If such solution is set up, you should:

- Install the software on the test machine to confirm its functioning,
- Provide, if necessary, the credentials to access the test session,
- Privilege, if possible, a full access without any time limitations to avoid untimely disconnection (not mandatory but recommended)

The choice to include a remote access solution is left up to the producer, but its integration allows for better handling of updates and technical interventions, while significantly saving time for the tenant.

F. HARDWARE

This table covers both the hardware deliverable to your customers and the hardware provided to the RCRS Service as a Test-Machine.

It is not expected to receive a cash register system equipped with all possible options, but the mandatory options necessary to allow the full testing of all its features are nevertheless required.

The "provided" column will be the base for the intake sheet, listing the hardware you lend us with their respective serial numbers.

Type	Provided as Test machine during Intake	Production machine for your customers	Description and additional info
Computer(s) *Main station + eventual backend.*	*Can be a laptop or a tablet*

Others *Please, specify*	☐	☐	

G. ASSEMBLY DIAGRAM

An assembly diagram will allow the physical installation of the POS in case RCRS agents are not familiar with it. It will specify which port must be used for which hardware piece. If the assembling implies additional configuration (IP/Mac/Port/network addressing), please provide the relevant data about it.

Please, join the assembly diagram in annex.

Assembly diagram in annex	☐

Remarks point I.

III. POS FEATURES

POS CONFIGURATION

A. INSTALLATION PARAMETERS

Describe the parameters that must/can be configured during installation. Please indicate which of these parameters are fixed and can no longer be changed. Describe who (which role) can install and change parameters (afterwards). For this purpose, a reference to any installation manual is sufficient, as long as it contains all the information requested.

Configuration	
The list is clear and complete	☐
The defined parameters are indicated	☐
Defined parameters can be fixed	☐ Yes ☐ No
The logs are stored	☐ Centrally ☐ Locally
The logs cannot be deleted	☐

B. INTERNET CONFIGURATION

Connectivity	
The POS needs an internet connection	☐ Yes ☐ No
The Internet connection must be …	☐ Ethernet ☐ Wifi ☐ Both configurable
Specific needs for network setup	

C. USERNAMES & PASSWORDS

	Username	Password	Comments
OS login			Ideally, none.
POS login			Variants on 1, 2, 3, 4,..
Administrator			
Server			
Technician			INSS = 00000000097
Kiosk / App			INSS = 00000000029
Others			

User Management

Please provide the description of the users and the role management as well as the location in the POS database (table name, field name, ...) where these user data (identity, time registrations, logins) are stored. Indicate the access rights (read, add, modify, delete) to the various data: data(base) and logs.

User Management	
Users and roles management description	☐
Description of the access rights	☐

Remarks point II.

FDM CONNECTION

A. POS CONNECTION TO THE FDM

Mode	
Stand alone	☐
LAN	☐
Cloud based	☐
Configurable	☐

Options	
Load-balancing	☐ Yes ☐ No
➔ IF YES, using Middleware?	☐ Yes ☐ No
POS compatible with multiple FDM brands	☐ Yes ☐ No
Terminals cannot communicate with FDM unless identified with *posId*. If a Terminal can communicate directly to the FDM, it should be considered as a POS with its own posId.	☐

B. FDM CONNECTION

Please describe how the FDM link can be created and configured in the cash register. If you are using external middleware (possibly from FDM manufacturers), please indicate it clearly.

The connection to the POS is explained	☐

External Middleware

None	☐	
FDM Manufacturer's software	☐	Which ?
Other app	☐	Which ?

C. NON-OPERATIONAL FDM

If the FDM is disconnected, the user may no longer be able to enter transactions

a) Please describe whether the cash register provides an error immediately or only when there is no response from the FDM when transaction data is sent to it.

b) Please describe what the cash register does with a transaction that has been entered and sent to the FDM but cannot be registered in the FDM.

The **FDM disconnection is described**	☐

POS FEATURES

A. POS EVENTS POSSIBILITIES

	Available ?	Paper printable ?	Digital printable ? (how ?)	Copy possible? (C event)
N – Sales	Mandatory	Mandatory	Mandatory	☐
R – Report	Mandatory	☐	☐	☐
S – Social	Mandatory	N/A	N/A	N/A
P – Pro Forma	☐	☐	☐	☐
T – Training Mode	☐	☐	☐	☐
I – Invoice	☐	☐	☐	☐
C – Copy	☐	☐	☐	Forbidden
F - Financial	☐	☐	☐	☐

B. EVENT NUMBERING

Numbering	**Numbering**
PosFiscalTicketNo	☐ Global ☐ By Event Label ☐ By Terminal
Ticket Numbering	☐ Global ☐ By Event Label ☐ By Terminal
	☐ Other, if so please specify.

C. PROHIBITED FUNCTIONS

A registered POS system cannot present any features that allow it to delete, change, or add registrations that have already been recorded

Producer declares that no such features are not available.	☐

D. MANDATORY FUNCTIONS

Zero-registration

Please describe how a registration without Product lines can be generated, if possible. If such zero registration is never possible, the applicant must state it formally in the report.

E. PRESENCE RECORDING

The login of a user and the recording of its presence time are two separate concepts.

No operation whatsoever may be possible on the registered POS system without a user being logged in. Thus, each and every operation is attributed to a specific user.

The presence registration is used for social security matters, related to possible discounts on social security fees. While its use is not compulsory, the POS must provide the possibility to record presence time, using the S event (work in/out). It also means that time recording of users that usually don't work with the POS must be possible.

Please describe how the logging is implemented in the POS system and whether or not it's linked to the S event)

Please describe how the S event is implemented on the POS.

Presence recording	
Description of its use	☐
Presence recording registration is linked to Work In/Work Out buttons.	☐ YES ☐ NO

F. ADVANCED FUNCTIONS

Any function used by your Pos MUST BE tested prior to application. The application for certification will be refused if any present function has not been tested.

Functions	Description	Used by POS	Matching Use Case	Link to the result
Normal (N)		**Mandatory**	M110	
Full Refund		☐	M111	
Partial Refund		☐	M112	
Report (R)		**Mandatory**	Reports	
Social (S)		**Mandatory**	M140/141	
Pro Forma (P)	A non-VAT ticket to record operations	☐	M121	
Order on Standby	Order is recorded and can be modified before payment	☐		
Prebill Pro Forma	A summary of the order before payment	☐	M123	
Are all the P events printable ?	Optional. Specify if digital/paper.	☐		
Cost Center management	Ability to allocate and move transactions and products to specific cost centers (such as tables, chairs, customers, ...). Imply Proforma tickets.	☐	M122	
Allocation	Assign products to a cost center or move to a new cost center. (Customers, Tables, Chairs or rooms)	☐		
Splitting	Move products on one cost center to different cost centers (one-to-many).	☐	UC240/241/243	
Merging	Move products from different cost centers to one cost center (many-to-one).	☐	UC250/251/252	
Bill management	Multiple payments per bill or multiple VAT tickets per bill.	☐		
Split payment	A bill is payed with multiple payments or payment methods. 1 VAT ticket	☐		
Split bill	A bill is split to multiple bills (e.g. 1 per customer), multiple VAT tickets	☐		
Split bill (equal)	A Bill is split to multiple bills of equal amounts, multiple VAT tickets	☐		
Invoice (I)		☐	UC150	
Credit note	= Negative invoice.	☐		
Copy (C)	Copy of a previous event.	☐	M160	
Training (T)	School mode.	☐	M171	
Cash Flow Management	Adding / removing money of the float.	☐	M130	
Cash Drawer management		☐	M131	
Payment methods		☐		
Cash	Imply Cashdrawer (connected or not)	☐		
Debit card		☐		

Credit card		☐		
Customer credit	Imply Customer Management	☐		
Hotel billing	Imply an external billing system	☐		
Meal voucher	Ticket Restaurant	☐		
Payment change	Possibility to change the payment method after the initial payment.	☐	M132	
Multipurpose Vouchers (MPV)	Multipurpose Voucher. Considered as a payment method.	☐	UC260/261	
Single Purpose Vouchers (SPV)	Can be bought and taxed as a regular meal.	☐	UC270/271	
Foreign Currencies	Payments in other currency then euro.	☐	UC296	
Rounding of payments	Mandatory for cash, forbidden for vouchers	☐	Roundings	
Rounding of payment by ~~EFT~~ card	Optional. Must be decided one for all at installation.	☐	Roundings	
Delivery management	Is the VAT ticket printed before or after delivery ?	☐		
Discount/PriceChange	Cannot go beyond 100%	☐		
Composite products	Products composed of 2 or more other existing products (e.g. a menu).	☐	UC200	
Line price change	Apply a price change to one product line.	☐	UC220	
Event price change	Apply a price change to the whole event.	☐	UC223	
Multiple price change	Lines can have multiple price changes (coming from different line price changes and/or event price chages.	☐	UC224	
Corrections	Quantity change	☐	UC230	
Offered/Free article	100% discount	☐		
Programmed happy hour	Automatic discount on certain periods	☐		
Customer management		☐		
Member discount	Members pay less in some circumstances	☐		
Monthly fee	Members are billed once a month	☐		
Open price	"Price of the day"	☐		
Price by weight	Imply a weight scale	☐		
Service ticket	Bar & kitchen. No price, no control data	☐		
Others	Please specify	☐		

Remarks

Important remarks on invoices

Starting from 01.01.2026 all invoices issued in a B2B (and B2G) context must legally be issued in a structured electronic way and dispatched to the final recipient via an access point of the Peppol network. The POS may additionally still create paper and other digital prints of the invoices.

Invoices issues in B2C context are not in scope of this new regulation.

Please describe in the box hereunder how your POS complies to this new regulation (direct POS connection to Peppol network, API from POS to access point of the Peppol network, API to invoicing software that is compliant, ...).

Please note that in case of non-compliance the issuing of invoices on the POS should be disabled.

G. COSTCENTERCHANGE (TABLE MANAGEMENT)

Costcenter change	
POS allows costCenterChange towards 'room'	☐ Yes ☐ No
POS allows recalculation of priceChanges in the case of a costCenterChange*	☐ Yes ☐ No

*If yes: best practise is to use 2 steps:

1. Make the costCenterChange
1. Another signOrder with the recalculation

Please describe where the link can be found in the data(base) between:

a. the original ticket and the split/merge tickets
b. the original cost center and the split/merge cost center
c. the original cost center and the cost center it has been changed to

Costcenter change	
Links in database are described	☐

H. DIGITAL RECEIPT ISSUANCE

Although the possibility to issue tickets digitally is mandatory, there are no mandatory specifications on how to implement this.

Please describe how this is implemented in your POS and how the real handover of the digital receipt can be guaranteed.

I. TERMINALS AND DEVICES

Terminals and devices	
Does the POS allow working with multiple hardware devices on a terminal (roaming terminals) ?	☐ Yes ☐ No

J. PERIODS

Periods	
Does the POS allow working with both opening periods (bookingDate) and slots (bookingPeriod)?	☐ Yes ☐ No
If yes, how Is this configured?	

K. DRAWERS

Drawers	
Is this functionality available on POS ?	☐ YES ☐ NO
➔ IF YES ONLY	
Is this a physical drawer/wallet?	☐ YES ☐ NO
Is this possible to have multiple drawers per POS or User?	☐ YES ☐ NO
Is this a virtual drawer?	☐ YES ☐ NO
None (default drawer hardcoded for the graphQL mutations)	☐ YES ☐ NO

Please describe its implementation

! When using a drawer, the Users Reports must be ventilated by paiement methods.

L. REPORTS

Reports	
Z-reports: Possible only once per bookingDate	☐ YES ☐ NO
Z-report turnover and users: are they connected and issued together?	☐ YES ☐ NO
Z-report turnover and users: are they created automatically? (preferred)	☐ YES ☐ NO
Does the POS have more reports than the mandatory X & Z tax reports?	☐ YES ☐ NO

➔ IF YES ONLY: please describe them and show how the match with the amounts in the fiscal ones. Also provide the queries used.

M. THIRD-PARTY INTEGRATIONS (API, ETC)

Name	
Deliveroo	☐
TakeAway.com	☐
Uber Eats	☐
Other partners	Please specify

(*) = 1 Carpaccio (EUR 15) + 1 Burger (EUR 23)

(**) = 1 Carpaccio (EUR 16) + 1 Burger (EUR 24) + 1 Matching Wines (EUR 18)

(***) = 1 Aperitif + 1 Soft Drink

IV. GRAPHQL COMMUNICATION PROCEDURE

TESTING PROCEDURE

The following steps must be followed :

1) Using an FDM simulator, apply the described scenario to your POS (and provide simulator with the testing machine).
2) Check the amounts in the VAT table if necessary.
3) Check your JSON using the table.
4) **Add the results**
    a. The JSON communication between POS and FDM (request and response)
    b. The ticket (if delivered)

    ➔ **as attachments or in an annexed document.**

If a mutation is not used, you do not have to fill the test.

The *Uses Cases* can be downloaded here :

https://www.systemedecaisseenregistreuse.be/fr/sce-2-0

https://www.geregistreerdkassasysteem.be/nl/gks-2-0

SALE (N) – *SIGNSALE* MUTATION – M110

The use of this function is MANDATORY.

Description: Registration of a sale.

JSON TESTING
Conditions : Direct Sale, in the house.
Scenario : **1. Register 2x Dry Martini and 1x Burger of the Chef** **2. Pay cash** **3. Print the VAT ticket on paper**

X TURNOVER (R) – *SIGNREPORTTURNOVERX*

This mutation is mandatory.

Description: A Turnover X Report is a detailed report that summarizes transactions made on a cash register over a given period (bookingDate). It includes information such as total sales, number of transactions, payment methods used (cash, credit cards, etc.), refunds, discounts, etc.

For producers who do not have the discount and/or refund options, they can create their own tests according to Reports Uses Cases. If Pro Forma's are not available, only the data related to them will be missing, but this will not affect the turnover.

JSON TESTING This test is based on the Reports_Testing folder
Scenario:
Please open the folder "Reports_Testing" in appendix to perform this test. In the folder "Reports_Testing in the appendix, you will find the use case related to this report. **Ticket 1: Registration of Work In for User 1 (employeeId 84022899837)** **Ticket 2: User 1 makes a registration for the direct sale with 1x Dry Martini and 1x Carpaccio Beef, and payment by Bancontact.** **Ticket 3: User 1 cancels ticket 2. Refund in cash.** **Ticket 4: Registration of Work In for User 2 (employeeId 75061189702)** **Ticket 5: User 2 registers an order on table 1: 1x Dry Martini, 1x Carpaccio Beef and 1x crème brûlée.** **Ticket 6: User 2 creates the prebill for table 1 (order in ticket 5):** **Ticket 7: Client complains, user 2 registers a discount of 10% on the order of table 1 (order placed in ticket 5):** **Ticket 8: user 2 registers the sale of the order on table 1 (ticket 7), Client pays 27,80 euros with a voucher of the store and10 euros in cash.** **Ticket 9: User 1 registers an order with 1x Dry Martini and 1x Coca Cola on table 1.** **Ticket 10: User 1 makes a sale of ticket 9, 15.05 euro, payment by cash (rounding of +0.01 euro).** **Ticket 11: User 2 makes a direct sale with 1x Coca Cola and 1x Tapas Variation, payment: 2.00 euros by Bancontact and 4.40 euros in cash (The rounding is +0.02 euro)** **Ticket 12: Registration of Work out for User 1 (employeeId 84022899837)**

The content of the JSON reports for users (X and Z) as well as the turnover reports (X and Z) is included in the appendix of this PDF.

POS Results

1. **JSON REQUEST**
2. **REPORT (DIGITAL OR PAPER)**

Remarks

Z TURNOVER (R) – *SIGNREPORTTURNOVERZ*

This mutation is mandatory to use.

Description: The Z Turnover is a report generated by the POS that summarizes transactions over a BookingDate usually a working day. A Z Turnover is issued for each BookingDate (even if it is not taken daily).

This report is numbered.

For producers who do not have the discount and/or refund options, they can create their own tests, which will be verified later. If the pro forma is not present, only the data related to the pro forma will be missing, but this will not affect the revenue.

JSON TESTING : Refer to X Turnover **This test is based on the Reports_Testing folder**
Scenario :
Print the Z Turnover report you just made.

The test has been done and the JSON has been added	☐

Remarks

X USER (R) – *SIGNREPORTUSERX*

This mutation is mandatory to use.

Description: A "user report X" is a document generated by a POS that summarizes the transactions carried out for the current bookingDate by users.

For producers who do not have the discount and/or refund options, they can create their own tests, which will be verified later. If the pro forma is not present, only the data related to the pro forma will be missing, but this will not affect the revenue.

JSON TESTING

This test is based on the Reports_Testing Folder

Scenario:

Please open the folder "Reports_Testing" in appendix to perform this test.
In the folder "Reports_Testing in the appendix, you will find the uses cases related to this report.

Ticket 1: Registration of Work In for User 1 (employeeId 84022899837)

Ticket 2: User 1 makes a registration for the direct sale with 1x Dry Martini and 1x Carpaccio Beef, and payment by Bancontact.

Ticket 3: User 1 cancels ticket 2. Refund in cash.

Ticket4: Registration of Work In for User 2 (employeeId 75061189702)

Ticket 5: User 2 registers an order on table 1: 1x Dry Martini, 1x Carpaccio Beef and 1x crème brûlée.

Ticket 6: User 2 creates the prebill for table 1 (order in ticket 5):

Ticket 7: Client complains, user 2 registers a discount of 10% on the order of table 1 (order placed in ticket 5):

Ticket 8: user 2 registers the sale of the order on table 1 (ticket 7), Client pays 27,80 euros with a voucher of the store and10 euros in cash.

Ticket 9: User 1 registers an order with 1x Dry Martini and 1x Coca Cola on table 1.

Ticket 10: User 1 makes a sale of ticket 9, 15.05 euro, payment by cash (rounding of +0.01 euro).

Ticket 11: User 2 makes a direct sale with 1x Coca Cola and 1x Tapas Variation, payment: 2.00 euros by Bancontact and 4.40 euros in cash (The rounding is +0.02 euro)

Ticket 12: Registration of Work out for User 1 (employeeId 84022899837)

Remarks

Z USER (R) – SIGNREPORTUSERZ

This mutation is mandatory to use.

Description: A "user Z report" is a document generated by a POS that summarizes the transactions carried out by users over a specific period (bookingDate), usually a working day. Unlike the X report, the Z report closes the current transactions, resetting the totals to start a new period. The latter allows for a final control of sales and ensures that all transactions are correctly recorded before the reset.

For producers who do not have the discount and/or refund options, they can create their own tests, which will be verified later. If the pro forma is not present, only the data related to the pro forma will be missing, but this will not affect the revenue.

JSON TESTING Refer to X Turnover or X User **This test is based on the Reports_Testing folder**
Scenario:
Print the Z User report you just made.

The test has been done and the JSON has been added ☐

ROUNDING OF PAYMENT METHODS

Description: In Belgium, the rounding of cash payments to the nearest 0,05 EUR is mandatory. Rounding is extend to a maximum of +/- 0,02 EUR.

Preliminary

These guidelines are not sufficient enough to success the rounding payment testing. Please take into account all the rules outlined in the detailed descriptions.

Method

3. In all cases: perform test 1 & 2.
4. If you only round cash payments : perform test 3 in addition.
5. If you round all means of payments: perform test 4 in addition.
6. Insert the results in appendix such as for the others tests.

BASIC TEST 1 : CASH ROUNDING

SITUATION 1

Scenario :
Conditions: direct sale
1x Dame Blanche 11,52€ (VAT B)
Pay only CASH

Products	Quantity	Price VAT incl. / unit	VAT (%)	VAT (euros)	VAT excl.	VAT incl.
Dame Blanche	1	€ 11,52	12%	€ 1,23	€ 10,29	€ 11,52
Total				€ 1,23	€ 10,29	€ 11,52
To pay						€ 11,50
Rounding						€ -0,02

SITUATION 2

Scenario :
Conditions: direct sale
1x Tapas Variation 3,34€ (VAT B)
Pay only CASH

Products	Quantity	Price VAT incl. / unit	VAT (%)	VAT (euros)	VAT excl.	VAT incl.
Tapas Variation	1	€ 3,34	12%	€ 0,36	€ 2,98	€ 3,34
Total				€ 0,36	€ 2,98	€ 3,34
To pay						€ 3,35
Rounding						€ 0,01

SITUATION 3

Scenario :

Conditions: direct sale

1x Dame Blanche 11,52€ (VAT B)

1x Tapas Variation 3,34€ (VAT B)

Pay only CASH

Products	Quantity	Price VAT incl. / unit	VAT (%)	VAT (euros)	VAT excl.	VAT incl.
Dame Blanche	1	€ 11,52	12%	€ 1,23	€ 10,29	€ 11,52
Tapas Variation	1	€ 3,34	12%	€ 0,36	€ 2,98	€ 3,34
Total				€ 1,59	€ 13,27	€ 14,86
To pay						€ 14,85
Rounding						€ -0,01

BASIC TEST 2 : MEAL VOUCHER

Meal voucher is never rounded.

SITUATION 4

Scenario :

Conditions: direct sale

1x Dame Blanche 11,52€ (VAT B)

1x Tapas Variation 3,34€ (VAT B)

Pay 11,52€ with MEAL VOUCHER

Pay the sold with CASH.

Products	Quantity	Price VAT incl. / unit	VAT (%)	VAT (euros)	VAT excl.	VAT incl.
Dame Blanche	1	€ 11,52	12%	€ 1,23	€ 10,29	€ 11,52
Tapas Variation	1	€ 3,34	12%	€ 0,36	€ 2,98	€ 3,34
Total				€ 1,59	€ 13,27	€ 14,86
To pay	MEAL VOUCHER					€ 11,52
Rest						€ 3,34
To pay	CASH					€ 3,35
Rounding						€ 0,01

BASIC TEST 3 : MULTI-PAYMENTS 1

Only if your POS only rounds cash payments !

SITUATION 4

Scenario :
Conditions: direct sale
1x Dame Blanche 11,52€ (VAT B)
1x Tapas Variation 3,34€ (VAT B)
Pay 3,13€ with MEAL VOUCHER,
Pay 3,97€ with DEBIT CARD,
Pay the sold with 10€ CASH.

Products	Quantity	Price VAT incl. / unit	VAT (%)	VAT (euros)	VAT excl.	VAT incl.
Dame Blanche	1	€ 11,52	12%	€ 1,23	€ 10,29	€ 11,52
Tapas Variation	1	€ 3,34	12%	€ 0,36	€ 2,98	€ 3,34
Total				€ 1,59	€ 13,27	€ 14,86
To pay	MEAL VOUCHER					€ 3,13
Rest						€ 11,73
To pay	DEBIT CARD					€ 3,97
Rest						€ 7,76
To pay	CASH					€ 10,00
Returned						€ 2,25
Rounding						€ -0,01

BASIC TEST 4 : MULTI-PAYMENTS 2

Only if your POS rounds all payment methods ! Meal voucher is never rounded.

SITUATION 5

Scenario :
Conditions: direct sale
1x Dame Blanche 11,52€ (VAT B)
1x Tapas Variation 3,34€ (VAT B)
Pay 1,85€ with DEBIT/CREDIT CARD,
Pay 0,92€ with MEAL VOUCHER
Pay the sold with 15€ CASH.

Products	Quantity	Price VAT incl. / unit	VAT (%)	VAT (euros)	VAT excl.	VAT incl.
Dame Blanche	1	€ 11,52	12%	€ 1,23	€ 10,29	€ 11,52

Tapas Variation	1	€ 3,34	12%	€ 0,36	€ 2,98	€ 3,34
Total				€ 1,59	€ 13,27	€ 14,86
To pay	DEBIT CARD					€ 1,85
Rest						€ 13,00
Rounding						-0,01
To pay	MEAL VOUCHER					€ 0,92
Rest						€ 12,08
Rounding						Meal voucher is never rounded
To pay	CASH					€ 15,00
Returned						€ 2,90
Rounding						€ 0,02

Payments TOTAL					€ 14,87
Roundings TOTAL					€ 0,01

V. POS BEHAVIOR ON FDM REPLIES

FDM responses may contain information, warnings and/or errors.

In pre-defined cases, the POS has to undertake certain actions. All of them are described in the table tb_messages of the detailed descriptions of the POS in section 2.2.4., message object.

Some of them are mandatory to be shown via the user interface of the POS, some are optional. In all cases, perform the necessary tests and attach the necessary evidence (e.g. screen shots of the UI).

In the following table, please indicate which messages are shown.

Code	Message	nature	display	ON POS
CLIENT_CERT_NEAR_EXPIRATION	Client certificate expires in less than 4 months	Warning	O	☐ YES ☐ NO
CLIENT_CERT_EXPIRED	Client certificate has expired	Warning	M	☐ YES
RTC_SYNC_FAILED	FDM could not synchronize real-time clock.	Warning	O	☐ YES ☐ NO
UPDATE_URLS_FAILED	FDM could not update URLs.	Warning	O	☐ YES ☐ NO
UPDATE_TRUST_CERT_FAILED	FDM fails to update trust certificates	Warning	O	☐ YES ☐ NO
UPDATE_TASK_LIST_FAILED	FDM could not download the task list.	Warning	O	☐ YES ☐ NO
TASK_FEEDBACK_FAILED	FDM could not report the task result	Warning	O	☐ YES ☐ NO
NOP_FAILED	FDM could not post a NOP message	Warning	O	☐ YES ☐ NO
BUFFER_NEAR_FULL	FDM buffer usage exceeds 70 %	Warning	M	☐ YES
SERVER_CERT_RESOLVE_FAILED	FDM could not resolve server certificate	Warning	O	☐ YES ☐ NO
TRANSACTION_UPLOAD_FAILED	FDM has more than 10 failed attempts to post business transaction	Warning	O	☐ YES ☐ NO
INITIALIZATION_FAILED	FDM initialization has failed	Warning	O	☐ YES ☐ NO
RTC_NOT_INITIALIZED	FDM Real Time Clock not synchronized	Warning	N	☐ NO
CORRUPT_RECORD_ENCOUNTERED	FDM memory contains corrupt transaction	Warning	N	☐ NO

VII. DATA ACQUISITION

RETENTION OBLIGATION (ART. 60 VAT ACT)

THE ACT

Article 60. § 1 ...

§ 2. ...

§ 3. ...

§ 4 The books and other documents, of which the keeping, preparation or issuance are required by this Code or the regulations issued in implementation thereof, shall be preserved by those who have kept, prepared, issued or received them for ten years from 1 January of the year following their closure as regards books, from their date as regards other documents, or from the year in which the right to deduction arose in the cases referred to in Article 58, § 4, 7°, second paragraph, in the case of documents referred to in Article 58, § 4, 7°, fourth paragraph.

...

In deviation from the second paragraph, with regard to data relating to analyses, programmes and the operation of computerised systems, the retention period shall begin on 1 January of the year following the last year in which the system described in such data was used.

The King may extend the retention period referred to in the first paragraph and paragraph 3 in order to ensure the verification of revisions of deductions made in implementation of Article 49, 2° and 3°. He may, in the cases and according to the rules which He determines, limit the retention period of documents other than invoices and books.

§ 5. ...

§ 6. ...

CONCRETE

The responsibility for preservation lies with the taxpayer-operator. However, the producer of the cash register system must ensure that it can fulfil its obligations.

In his certification application, the manufacturer of the POS system indicates how, how long and where these digital data are kept, where the data are located, what they look like, what the database structure is. During the procedure, the certifying service may request the source code of the software used for analysis.

OBLIGATION OF SUBMISSION (ARTICLES 61 AND 62 VAT ACT)

THE ACT

Article 61. § 1 Every person shall be obliged to submit the books, invoices, copies of invoices and other documents or their copies, which he is required to keep in accordance with Article 60, at the request of the administration in charge of value added tax, without displacement and without undue delay, in order to be able to verify the correct levying of the tax on his behalf or on behalf of third parties.

...

Where books, invoices and other records are kept in electronic format, the administrations shall be entitled to be submitted in a legible and understandable form of the data recorded on data media. This administration may also request the person referred to in the first paragraph to make copies in their presence and on their equipment of all or part of the aforementioned data in the form they require, as well as to carry out the computer operations deemed necessary to verify the correct assessment of the tax.

Without prejudice to the taxpayer's right to request or give oral information, the submission of the books, invoices, copies of invoices and other documents or their copies referred to in the first paragraph, for the natural persons and legal entities referred to in the fourth paragraph, shall also relate to the provision of such books, invoices and other documents via a secure electronic platform of the FPS Finance.

...

§ 2.

...

§ 3. The obligations set out in this article also apply when the data requested by the administration are located digitally in Belgium or abroad.

Article 62 § 1. Any person shall be obliged, at the request of the officials of the administration responsible for value-added tax, to provide, orally or in writing, any information requested from him in order to verify the correct levying of the tax on his own account or on the account of third parties.

SPECIFICALLY FOR RCRS

The data are stored locally

The transmission of certain transaction data by the RCRS to the FPS servers does not relieve a taxable operator of the obligation to submit all digital data relating to its cash register system. The submission includes the inspection and digital copying of part or all of the data on the POS system, in the form desired by the administration.

The producer of the POS system indicates in the certification application where these original data are located, how and where they can be archived, how they can be accessed, how they can be copied and/or how extracts can be made from them. If necessary, a procedure that can be used for each customer is proposed.

Data are stored 'in the cloud'

The same applies to data held in the cloud, regardless of where it is stored.
These data are the property of the taxpayer-operator and are fully subject to the submission obligation, under the same conditions as if they were stored locally. If it is unable to submit it itself, the administration can have the data submitted (in the same way) by the host of the data, in Belgium or abroad.

In the certification application, the producer of the POS system indicates where these original data are located, how and where they can be archived, how they can be accessed, how they can be copied and/or how extracts can be made from them. If necessary, a procedure that can be used for each customer will be proposed.

I have taken this into account and furnished the RCRS team a procedure	☐

DATA ACQUISITION SHEET

A. GENERAL INFORMATION

Producer	
Point of contact	
E-Mail	
Telephone Number	
Certificate Number	To be completed by FPS FINANCE
Certification Date	To be completed by FPS FINANCE
Software Name	
Software Version number	
Operating System	
Certification agent	To be completed by FPS FINANCE
Back-up certification agent	To be completed by FPS FINANCE

B. NETWORK & DEVICES

Cloud-based cash register	☐ Yes ☐ No
If not, is an internet connection required?	☐ Yes ☐ No
How is the POS connected to the FDM	☐ Ethernet ☐ WiFi ☐ USB ☐ POE
Is the cash register equipped with external hardware (kiosk, app, tablet, network, ...) ?	☐ Yes ☐ No
If yes, what is the version of the device?	
What features are available on the remote control?	
Is there a connection with external (online ordering...) or internal (stat, ERP, ...) softwares ?	

C. LOGS

The logs are accessible, viewable and copyable.	☐
If yes, here is how you can view/copy the logs:	

Describe the steps to copy the DB below:

D. REPORTS X/Z

How to view/print X/Z turnover reports? (Explain via screenshots if necessary)

How to view X/Z user reports? (Explain via screenshots if necessary)

E. DATABASE

Software DBMS* (+ version)	
Programming language	
How is the database secured?	

LOG IN SPF FIN	
PASSWORD SPF FIN	

F. SOFTWARE VERSION

N° version	Date	SHA1
vb. : v1.XXX	24/01/2025	EUR-Lex - 6153A6FA0E4880D9B8D0BE4720F78E895265D0A9 - NL

VIII. SIGNATURE

Important:

If any of the following conditions are not met:

1. Completed and signed application,
2. Test results present in the PDF or in the annexes,

Your application may be rejected by the Administration.
